

Women's dietary diversity relative to healthy-diet affordability

n = 66 countries · OLS slope -0.71 (95% bootstrap CI -0.82 to -0.60) · $R^2 = 0.65$

shaded band = ± 1 residual SD (14 pts) · vertical line = median unaffordability (50%) · labels: |studentized residual| > 1 · LOO-CV $R^2 = 0.63$

hollow markers: MDD-W survey with $\geq 10\%$ of population excluded, telephone frame, or unverified national coverage
